

# Chris Morrow

UI Developer

[www.linkedin.com/in/chrisjmorrow](http://www.linkedin.com/in/chrisjmorrow)

[@\\_ChrisMorrow](https://twitter.com/_ChrisMorrow)

## Current Work

Over the past few years, my projects have included the use of JavaScript, AngularJS, D3JS, Node, Gulp, Bower, jQuery, RequireJS, KnockoutJS, Sass/CSS, and HTML 5. I am comfortable working on projects using .Net or Java servers. Most applications or websites have required some level of responsiveness, and I'm comfortable with using Bootstrap and Foundation frameworks to make the web app fully-responsive. I always strive to use the latest best practices and style guides for consistent and manageable code across teams and projects.

## Work Experience

( Full work experience on LinkedIn )

**Senior UI Developer** [November 2012 - Present]

Soltech / Atlanta, GA
